RESUME

EMILIA D'AMADO

Date of birth: Jul 6, 2001
Nationality: Uruguayan

EXPERIENCE

OCT 2024 – ACTUAL
Montevideo, Uruguay

LECTURER POSITION / LAB ASSISTANT - NATURAL RESOURCES LABORATORY
Facultad de Ciencias, UdelaR

NOV 2025 – FEB 2026
Montevideo, Uruguay

LAB ANALYST (QUALITY ASSESMENT AND ENVIRONMENTAL CONTROL) - BIOASSAY LABORATORY
Intendencia de Montevideo

APR 2025 – MAY 2025
Antarctic Peninsula

MMO - SPATIOTEMPORAL OVERLAP OF KRILL FISHING WITH CETACEANS AND OTHER KRILL PREDATORS - RESEARCH PROJECT
Antartic Wildlife Research Fund, Norwegian Polar Institute

NOV 2024 – DIC 2024
Antarctic Peninsula

MMO - POLAR WHALE WATCH - RESEARCH PROJECT
University of Tasmania

APR 2024 – MAY 2024
Antarctic Peninsula

MMO - SPATIOTEMPORAL OVERLAP OF KRILL FISHING WITH CETACEANS AND OTHER KRILL PREDATORS - RESEARCH PROJECT
Antartic Wildlife Research Fund, Norwegian Polar Institute

OCT 2023 – NOV 2023
Imperia, Italy

MARINE FAUNE RESEARCH PROGRAM
Delfini Del Ponente APS

EDUCATION AND FORMATION

FEB 2026
Rio de Janeiro, Brasil

BASIC SAFETY TRAINING (CBSN)
Latitude Offshore

ENE 2026
Montevideo, Uruguay

PASSIVE ACOUSTIC MONITORING (PAM) & MARINE FAUNA OBSERVER (OFM) TRAINING COURSE
Toveri

MAR 2020 – DIC 2025
Montevideo, Uruguay

DEGREE IN BIOLOGICAL SCIENCES
Facultad de Ciencias, UdelaR

EDUCATION AND FORMATION

SEP 2024
Montevideo, Uruguay

ORGANISATIONS, ENVIRONMENTAL MANAGEMENT AND INNOVATION COURSE
The Open University

SEP 2024
Montevideo, Uruguay

LEADERSHIP COURSE
Santander Open Academy

NOV 2023 – DEC 2023
Uruguay - Argentina

INTRODUCTION TO CETACEAN RESEARCH IN ANTARCTIC AND SOUTH ATLANTIC WATERS COURSE
Programa de Desarrollo de las Ciencias Básicas (PEDECIBA)

FEB 2020
Montevideo, Uruguay

DIVE INTO SCIENCE SUMMER PROGRAM
Facultad de Ciencias, UdelaR

OTHERS

- OEUK Offshore Medical

SKILLS

LANGUAGES
Spanish (Native) · English (Proficient User) · Italian (Independent User)

DIGITAL TOOLS
Microsoft Office · Geographic Information System (ArcGIS, QGIS) · Statistical analysis programs (R, Python) · PAMGuard

COMPETENCES
Responsibility · Good communication · Teamwork · Problem solving ability · Organization and punctuality · Autonomy and proactivity

Joaquín Muñoz Oxley

PROFILE

Marine biologist with experience in visual monitoring of marine fauna, fisheries observer programmes, offshore surveys and fieldwork in remote environments. Background also includes oceanographic and biological sampling, and environmental consultancy both offshore and onshore.

ACADEMIC STUDIES

2022. Bachelor of Biological Sciences, Faculty of Sciences, Universidad de la República, Montevideo, Uruguay.

OFFSHORE TRAINING & CERTIFICATIONS

2025. Offshore survival (CBSN) certificate. Latitude Offshore. RJ, Brazil.
2025. Passive Acoustic Monitoring (PAM) and Marine Fauna Observer (MFO) Training Course. VIRIDEN. Montevideo, Uruguay.
2025. Marine Mammal Observer (MMO) Course – JNCC Approved.
2024. Personal Survival Techniques (IMO.119). Montevideo, Uruguay.
2024. Seafarer's Medical Certificate (ENG1). Montevideo, Uruguay.
2017. Onboard Scientific Observer Certification – DINARA. Montevideo, Uruguay.

OFFSHORE EXPERIENCE

2025**. Marine Mammal and Seabird Observer (Uruguayan counterpart, DINARA).** Participation in the joint Argentine–Uruguayan assessment survey of the northern anchovy stock, conducted in spring 2025 **aboard the Fisheries Research Vessel *Víctor Angelescu***. Additional tasks included biological sampling, CTD assistance, and bongo net operations. Monitoring of marine mammals and seabirds during survey transects. October–November, 24 days at sea.

2025. **Scientific Observer** on Falkland Islands (Malvinas) flagged fisheries targeting the species *Loligo* (*Doryteuthis gahi*) in the Falkland Islands' Territorial Waters. Tasks performed: Recording general fishing operations and bridge information; documenting catches, conducting biological sampling, and monitoring discards. Bycatch: Monitoring of Bird Scaring Lines (**BSL**) including **bird counts**, as well as **monitoring Pinnipeds** (SED) to prevent incidental capture. **Marine Mammal (MMO) sightings**. February – May. 80 days at sea.

2024. **Scientific Observer** on Falkland Islands (Malvinas) flagged fisheries targeting the species Hake (*Merluccius hubbsi)* in International Waters. Tasks performed: Recording general fishing

operations and bridge information; documenting catches, conducting biological sampling, and monitoring discards. Bycatch: Monitoring of Bird Scaring Lines (**BSL**) including **bird counts**, as well as **monitoring Pinnipeds** (SED) to prevent incidental capture. **Marine Mammal (MMO) sightings**. 29 days at sea in August.

2023. **Scientific Observer** on "Freezer" Fishing Vessel (Category "C", DINARA) with the target species Red Crab (Chaceon notialis). Tasks performed: recording detailed information on the fishing operation and bridge procedures. **Sighting** and interactions of **seabirds**, **MMO** and **megafauna**. 26 days at sea.

2022. **Scientific Observer** on "Freezer" Fishing Vessel (Category "C", DINARA) with the target species Red Crab (*Chaceon notialis*). Resource Evaluation Tide. Tasks performed: recording detailed information on the fishing operation and bridge procedures. Monitoring of catches, biological sampling, discards and by catch. **Sighting** and interactions of seabirds, **Marine Mammals (MMO**) and **megafauna**. 49 days at sea.

2021. **Scientific Observer** on "Freezer" Fishing Vessel (Category "C", DINARA) with the target species Red Crab (*Chaceon notialis*). Tasks performed: recording detailed information on the fishing operation and bridge procedures. Monitoring of catches, biological sampling, discards and by catch. **Sighting** and interactions of **seabirds**, **MMO** and **megafauna**. 64 days at sea.

2020**. Research Vessel**: "Survey in the Platform Extension Area," Vessel "Aldebarán," National Directorate of Aquatic Resources (DINARA). As a **Specialized Technician**, I contributed to the monitoring and observation of **seabirds** and **megafauna**, including **MMO**, **turtles**, and **fish**. My tasks involved collecting data on species' presence, behavior, and distribution in the context of environmental assessments. This research supported the study of biodiversity in the platform extension area. Cruise Chief: Diego Núñez. 9 days at sea.

ONSHORE EXPERIENCE

2024- 2026. Environmental Consultant – Bat Monitoring, Kentilux Wind Farm – Sigmaplus SRL.

2025. Environmental Consultant – Bird Monitoring, Elena Wind Farm (HIF Global) – Sigmaplus SRL.

2025. Environmental Consultant – Biodiversity Monitoring, San Miguel Citrus Crops – Sigmaplus SRL.

2025. Environmental Consultant – Biodiversity Monitoring and water sampling for subsequent analysis. La Jacinta Photovoltaic Plant. – Sigmaplus SRL.

2025. Environmental Consultant – Bird Monitoring, Quarry Project (San José) – Sigmaplus SRL.

2025. Environmental Consultant – Bird Monitoring, Land Development Project (Maldonado) – Sigmaplus SRL.

2024. Environmental Consultant – Bird Monitoring Technician – Regenerative Livestock Systems, Lanas Trinidad S.A.

2024. Environmental Consultant – Bird Monitoring – Environmental Impact Study, High Voltage Line Project (Tacuarembó – Melo).

2022-2023. **Field assistant in the project "Conservation and management of living marine resources of the Antarctic Peninsula: penguins as sentinels of the Southern Ocean"**. This research project aims to contribute to the design, monitoring and evaluation of conservation measures aimed at ensuring the sustainable exploitation of living marine resources in the environment of the Antarctic Peninsula, using pygoscelid penguins as sentinels of the marine ecosystem. Activities carried out: Counting of nests and chicks in the nursery (according to CCAMLR) and placement of tracking devices. Responsible: Dr. Alvaro Soutullo and MSc. Ana Laura Machado. Eastern Regional University Center, University of the Republic, Av. Cachimba del Rey s/n, CP 20000, Maldonado, Uruguay.

Carolina Rodríguez Pérez

Marine Biologist | Oceanologist

PROFESSIONAL RESUME

Marine Biologist and Oceanologist with broad onboard experience in offshore, polar, estuarine and coastal environments. Strong background in environmental monitoring, marine fauna observation, and marine sampling operations. Experienced in long-duration offshore deployments, 12-hour shift work, and compliance with environmental and operational protocols. Certified Scientific Observer with proven ability to coordinate sampling activities, produce accurate onboard reports, and work effectively within multidisciplinary and multinational teams.

CURRENT POSITION

Research Assistant (Grade 2) - Department of Geosciences, East Regional University Center (CURE) University of the Republic (UdelaR), Uruguay | 2024–Present

OFFSHORE & ONBOARD EXPERIENCE

ONBOARD ENVIRONMENTAL SAMPLING & MARINE FAUNA OBSERVATION – ANTARCTIC & SUBANTARCTIC REGIONS

- **OCTOBER > DECEMBER 2016 (63 DAYS ONBOARD)**
- ***HMS PROTECTOR* (ROYAL NAVY)**

- Environmental monitoring and microplastic sampling in surface waters.
- Observation of marine mammals and seabirds during navigation and sampling operations.
- Systematic data logging, onboard sample processing, and report writing.
- Long-duration offshore deployment under polar and subpolar conditions.
- Participation in a scientific exchange visit at the South Atlantic Environmental Research Institute (SAERI), Falkland Islands.

ONBOARD RESEARCH CAMPAIGNS – ESTUARINE AND OFFSHORE SYSTEMS | PLUMPLAS PROJECT

- **2021–2024**
- **FEDERAL UNIVERSITY OF RIO GRANDE (FURG)**

- Onboard sampling during multidisciplinary oceanographic campaigns.
- Environmental data collection in estuarine and shelf environments.
- Operation of oceanographic equipment (CTD, ADCP, GPS, Nets).
- Accurate recording of environmental observations and post-cruise reporting.

Sampling campaigns:

- Patos Lagoon Coastal Plume (Brazil)
- Amazon River Plume (Brazil) | *Akademik Boris Petrov*
- Black Sea – Gelendzhik (Russia)

SCIENTIFIC EXPEDITION COORDINATOR – RESEARCH CAMPAIGNS | ANTHROPLAST PROJECT

- **2024 > PRESENT**
- **OFFICE OF NAVAL RESEARCH (ONR-US) FUNDED**

- Coordination and supervision of marine and coastal sampling activities.
- Planning of sampling strategies, logistics and field operations.
- Liaison between scientific team and technical staff during field campaigns.
- Quality control of environmental data and technical reporting.
- Oversight of safety procedures during sampling operations.

Sampling campaigns:

- Patos-Merin lagunar system.

SCIENTIFIC OBSERVER & OFFSHORE TRAINING

- Offshore survival (CBSN) certificate - Latitude Offshore (RJ, Brazil) | February 2026
- Passive Acoustic Monitoring (PAM) and Marine Wildlife Observer (OFM) Training Course | January 2026 (40 hours)
- Postgraduate Course on **Sampling methods and techniques in marine science: from theory to practice.** CURE – University of the Republic (UdelaR), Uruguay | November 2025 (50 hours)
  - Intensive hands-on training. Final report and examination completed with Excellent grade.
- Training in Hydro-Morphodynamic Modeling in Coastal Waters – FURG (20 hours) | 2024
- NF-POGO Tropical Estuary Monitoring Training – UNESCO/IOC | 2024
  - International field-based training focused on environmental monitoring in tropical estuarine systems.
- Underwater Acoustics – University of the Republic (UdelaR), Uruguay | 2021 (24 hours)
  - Fundamentals of underwater sound propagation, noise sources, and introduction to marine bioacoustics.
- Scientific Observer Course – National Directorate of Aquatic Resources (DINARA), Uruguay | 2017
- Offshore Boarding & Maritime Safety Training – Uruguayan Navy / Royal Navy / Antarctic Institute | 2016
- Antarctic Research Summer School – Artigas Antarctic Scientific Base (UdelaR-Antartic Institute) | 2016
- Marine Mammal Bioacoustics Course– University of the Republic (UdelaR), Uruguay | 2015 (12 hours)
  - Acoustic detection, vocalizations and behavioral responses of marine mammals.

ACADEMIC BACKGROUND

MSC IN OCEANOLOGY - POSTGRADUATE PROGRAM IN OCEANOLOGY (PPGO) – FURG, BRAZIL | 2021–2024

Master's Project:
Trajectory, fate and physicochemical characterization of continental microplastic discharges to the inner shelf: Patos Lagoon coastal plume.

BSC IN BIOLOGICAL SCIENCES (OCEANOGRAPHY SPECIALIZATION) - FACULTY OF SCIENCES – UNIVERSITY OF THE REPUBLIC (UDELAR), URUGUAY | 2010–2018

Dissertation Project:
Marine anthropogenic debris on sandy beaches of the Uruguayan Atlantic coast.

FIELD & TECHNICAL EXPERIENCE

- Shipboard environmental sampling tools (sediment cores/dredge, water botlles, trawls)
- CTD, ADCP and GPS operation
- Environmental data management and reporting
- Laboratory processing of marine and environmental samples
- Coastal and estuarine monitoring programs
- Environmental and oceanographic data handling and visualization
- Python (basic data analysis and visualization: pandas, matplotlib)
- MATLAB (basic numerical and visualization tools)
- Ocean Data View (ODV): visualization of CTD and oceanographic profiles
- GIS: QGIS (basic)
- PADI Open Water Diver Certification | 2012

LANGUAGES

- Spanish: Native
- English: Fluent (professional offshore communication)
- Portuguese: Fluent

OTHER CERTIFICATIONS

- OEUK Medical
- Norwegian Medical
- JNCC MMO
- PSO BOEM
- PAM Operator
- NMFS Letter (PSO & PAM)
- NMFS Letter Nearshore

Documents

- Valid Seaman's book (Bahamas)
- Valid passport
- Valid USA Visa (B1/B2)
- Valid Canadian eTA
- Fully vaccinated

Biologist with more than 1,300 days of offshore experience and a solid track record in environmental consulting aboard seismic vessels. Since 2017, I have worked primarily as a Marine Mammal Observer (MMO), including nearly 5 years as Lead MMO and over 100 days operating PAM systems with different acoustic devices. Experienced in research cruises, sample collection, bycatch assessment, and strike avoidance procedures. Strong skills in identifying and photographing marine mammals and sea turtles, supported by extensive knowledge of their behavior. Highly adaptable and fully available for long offshore rotations.

Scientific Production

Offshore Experiences Description (experiences in the table below)

5. Marine Mammal Observer (MMO) in Argentina – Responsible for visual monitoring and implementing mitigation measures for marine mammals, sea turtles, and specific seabird species, in accordance with the Protocol for the Implementation of Marine Fauna Monitoring in Seismic Surveys established by the Argentine Ministry of Environment. Also responsible for preparing daily sighting reports and contributing as one of the authors of the project's final report.

4. Environmental Observer (EO) at The Ocean Cleanup project – Responsible for the observation and identification of marine mammals and sea turtles, implementing strike-avoidance protocols during transits between Victoria, BC (Canada) and the Great Pacific Garbage Patch (GPGP). Monitored protected species using underwater cameras during tow operations; assisted with bycatch assessments and plastic sorting during extraction procedures; conducted microplastic and neuston sampling using a manta trawl; and contributed to technical reporting and data documentation.

3. Passive Acoustic Monitoring Operator (PAM operator) in Brazil – Responsible for conducting acoustic detections of cetaceans and applying mitigation measures during seismic survey operations, in accordance with IBAMA (Brazilian Environmental Agency) guidelines, using Seiche Marine Acoustic Solutions equipment and the PAMGuard software.

Skills

- Dedicated
- Proactive
- Well-organized
- Clear communication
- Easygoing and cooperative
- Ethical and reliable
- Leadership experience
- Adaptable to the work environment
- Available for long trips

Aditional Info

- Not affected by sea sickness
- Availability for long trips
- Camera Canon EOS 7D DSLR; EF 70-300mm F4-5.6 IS USM II Lens
- Waterproof Reticle Binoculars with Compass 10x50mm – 114M at 1000m
- Open Water Diver – PADI

Courses taught

Cetaceans ID (and the main species in Brazilian Waters)
Sep 2025; Apr 2025; Jul 2024; Sep 2023; Mar 2022; Mar 2021; Nov 2020

Marine Mammal Observer in Seismic surveys (mitigation according to Brazilian guidelines)
Feb 2024; Feb 2023; Jan, Apr & Sep 2022; Feb & Sep 2021; Feb & Mar 2020; Jun 2019

Marine Turtles of Brazil – reproductive biology and conservation
Jun 2018; Jun 2018

2. Lead Marine Mammal Observer (Lead MMO) in Brazil – Responsible for visual monitoring and documentation of marine mammals and sea turtles, implementing mitigation procedures in accordance with IBAMA (Brazilian Environmental Agency) operational guidelines during seismic survey activities. Acted as Lead MMO and primary interface between the offshore monitoring team and onshore coordination. Additionally delivered IBAMA-compliant environmental induction and training sessions to seismic crew members.

1. Marine Mammal Observer (MMO) in Brazil – Responsible for the visual monitoring and documentation of marine mammals and sea turtles, as well as for implementing mitigation measures in accordance with IBAMA (Brazilian Environmental Agency) guidelines during seismic survey activities.

Offshore Experiences Description – Research in Brazil (experiences on the 2nd table)

III. Marine Mammal Observer (MMO) – MARESIS Telemetry Project MMO aboard the research vessel *Sea Moby Dick* for the MARESIS Telemetry Project, focused on assessing individual responses of marine mammals to offshore seismic activity. Responsibilities included cetacean monitoring, photo documentation, and support to telemetry specialists, such as locating tracking devices using antenna-based, radio, and visual search methods. The project is carried out by the Humpback Whale Institute (Instituto Baleia Jubarte) in partnership with Socioambiental Consultores Associados and funded by Petrobras' Research and Innovation Center (CENPES) and the Brazilian National Petroleum Agency (ANP).

II. Passive Acoustic Monitoring Operator (PAM operator) at Dedicated Integrated Monitoring Project (PMID) – PAM Operator in the Projeto de Monitoramento Dedicado Integrado (PMID, in Portuguese), responsible for conducting acoustic profiling along project transects and responsible for the deployment, recovery, and maintenance of autonomous acoustic recording systems (SoundTrap 300 and SoundTrap 600 hydrophones – Ocean Instruments NZ). The hydrophones were deployed at predefined sampling stations and depth strata, as specified in the project work plan.

I. Marine Mammal Observer (MMO) at Cetaceans Monitoring Project (PMC) – Responsible for the observation and identification of cetaceans aboard a research boat applying linear transect survey methodologies with distance sampling. Provided support for telemetry operations within the Projeto de Monitoramento de Cetáceos (PMC, in Portuguese) – Peregrino Field Production System – Phase II, Campos Basin, Southeastern Brazil.

Beatriz Cotrim Borgneth Fernandes Vieira

Oceanographer | PSO | MMO | PAM operator

EDUCATION

Oceanography, Rio de Janeiro State University (UERJ)

2013 – 2019

WORK EXPERIENCE

PSO at Infobond, United States

Visual monitoring of protected species following the BOEM/BSEE guidelines.

- ➔ Mitigation of pile driving activities for an offshore wind farm project and vessel strike avoidance (VSA) at Rhode Island shore (Vessel: Bokalift2 / Client: Gardline)

  June 11th-July 10th 2024 (30 days)

  August 13th-August 27th 2024 (15 days)

  September 24th - October 24th 2024 (31 days)

  April 29th - May 20th 2025 (22 days)

  June 17th - July 15th 2025 (29 days)

PSO/PAM operator at RPS, United States

Visual and passive acoustic monitoring of protected species following the BOEM/BSEE guidelines.

- ➔ Mitigation of a 2D streamer seismic survey (source type: airguns) and vessel strike avoidance (VSA) at Blake Plateau (Vessel: Marcus G. Langseth / Client: LDEO-Columbia University)

  July 14th-August 19th 2023 (37 days)

- ➔ Mitigation of a High Resolution Geophysical (HRG) Survey (source type: sparker) and Vessel Strike Avoidance (VSA) for Lease Area OCS-A 0538 (Vessel: Marcelle Bordelon / Client: Attentive Energy)

  October 30th 2023 – January 1st 2024 (64 days)

MMO at ROVESA Offshore Consulting, Mexico

December 28th-31st 2022 (4 days)

Protected species visual monitoring and assistance in PAM equipment (MSeis) mobilization for the mitigation of a vertical seismic profile (VSP) operation at Valaris DPS-5 rig.

MMO/PAM operator at NAV Oceanografia Ambiental, Brazil

Visual and acoustic monitoring of marine mammals and sea turtles as a mitigation to the impacts of offshore seismic surveys.

- ➔ as **MMO**:

PROFILE

Oceanographer with work experience in visual and acoustic monitoring of marine fauna, stranding and necropsy assistance, oceanographic sampling, environmental education, socio-environmental consultancy and currently working as MMO/PSO/PAM operator with 5 years of experience on offshore surveys.

DOCUMENTS AND CERTIFICATES

US Visa type B1/B2 - Expire Date: 16/06/2032

Commonwealth of the Bahamas Seafarer's Identification and Record Book - Expire Date: 01/12/2031

NMFS Approval Letter - March/2023

Protected Species Observer (PSO) Training by RPS - January/2023

JNCC Marine Mammal Observer Training by Intelligent Ocean - June/2022

Passive Acoustic Monitoring (PAM) Operator Training by BIOSONAR - February/2022

Offshore Surveyor Training by Seahouse Brasil Professionals - July/2023

Norwegian Maritime Authority Medical Certificate - May/2024 (Expire Date: 29/05/2026)

OGUK Medical Certificate - June/2024 (Expire Date: 29/05/2026)

Basic Offshore Safety Induction & Emergency Training (BOSIET) - June/2022 (Expire Date: 07/06/2026)

Compressed Air Emergency Breathing System (CA-EBS) Initial Deployment Training - June/2022 (Expire Date: N/A)

GWO Module Sea Survival Training - June/2024 (Expire Date: 07/06/2026)

LANGUAGES

Portuguese - **Native**
English - **Advanced**
Spanish - **Basic**

- 3D Nodes Seismic Survey at Bacalhau Field, Santos Basin (Vessel: Hugin Explorer - Fugro / Contractor: Seabed / Client: Equinor)

  January 17th 2021 – February 24th 2021 (39 days)
  April 14th 2021 - May 23th 2021 (40 days)

➔ as **Lead MMO**:

- 3D Nodes Seismic Survey at Parque das Baleias Field, Iracema Field and Tupi Field, Campos and Santos Basin (Vessel: SW Diamond / Contractor: Shearwater / Client: Petrobras)

  July 20th 2021 – October 27th 2021 (100 days)
  December 17th 2021 – February 2nd 2022 (48 days)
  March 21th 2022 – May 12th 2022 (53 days)
  June 29th 2022 – August 17th 2022 (50 days)
  March 1st 2023 - April 11th 2023 (42 days)

➔ as **PAM operator**:

- 3D Nodes Seismic Survey at Tupi Field and Iara Field, Santos Basin (Vessels: SW Diamond and SW Duchess / Contractor: Shearwater / Client: Petrobras)

  October 5th 2022 – November 21th 2022 (48 days)
  April 12th 2023 - May 25th 2023 (44 days)

Intern at **Aquatic Mammals and Bioindicators Laboratory from Rio de Janeiro State University (MAQUA-UERJ)**, Rio de Janeiro, Brazil

March 2018 - August 2018

Acoustic and visual monitoring, acoustic data processing and necropsy assistance of aquatic mammals.

Intern at **Brazilian Navy**, Rio de Janeiro, Brazil

April 3th 2018 - April 11th 2018 (9 days)

➔ Antares Oceanographic Vessel

Deployment of different oceanographic equipments, including Van Veen dredger for geological sampling, Van Dorn bottle for water sampling, XBT and CTD for physical-chemical data collection, as well as maintenance of meteo-oceanographic buoys for the SiMCosta project in partnership with NOAA.

Intern at **Instituto Australis**, Santa Catarina, Brazil

July 2016 - December 2016

➔ Southern Right Whale Project: Onshore visual monitoring of southern right whales and other cetaceans, environmental education and assistance in necropsy events.

➔ Beach Monitoring Project: Beach monitoring for reporting and rescuing stranded marine fauna.

Luis Daniel TRABA MEYER

Montevideo, 22 de diciembre 2025.
